PROJECTS

Full-Stack Project (Ruby on Rails, React.js/Redux, PostgreSQL, AWS, CSS) | **Illumevents**

A single page events hosting app inspired by Eventbrite

[live](#) | [github](#)

- RESTful JSON API's render jBuilder views to serve data into front end application
- Stores image uploads in the cloud in AWS S3 using Paperclip and Figaro
- Secures customized back and front end authentication using BCrypt ruby gem
- Utilizes ActiveRecord's polymorphic associations and ability to accept nested attributes in order to create events and tickets simultaneously

Project 1 (Programming Language) | *Title*

[live](#) | [github](#)

Brief Description

- Feature 1
- Feature 2
- Feature 3

SKILLS

Ruby, Rails, JavaScript, JBuilder, HTML, CSS, jQuery, React.js, Redux, Git, RSpec, SQL

EDUCATION

Web Development - App Academy (Summer 2017)

- 1000-hour full-stack programming bootcamp with <5% acceptance rate
- Teaches full-stack web development: Rails, SQL, JS, React, TDD, algorithms and programming best practices

BBA Real Estate - Macaulay Honors College At Baruch, Class of 2012

- GPA 3.94

EXPERIENCE

Property Manager/ Administration - Continental Equities Group Inc. (2014 - 2016)

- Actively managed 13 commercial and mixed used properties, with tasks including but not limited to drafting and negotiating leases, collecting rents and budgeting construction projects
- Increased accounting efficiency by finding and correcting all previous accounting errors, saving time and effort in generating general ledgers for tax return
- Automated invoicing by creating invoice templates on Excel and creating monthly recurring emails via Outlook, leading to more effective collection of rents, utilities and real estate tax income

Buyer and Salesman - Ismor Gem Corporation (2012 - 2014)

- Opened 16 new customer accounts in the greater New York area
- Transcribed sales data onto excel spreadsheets, allowing for more thorough analysis of regional and seasonal sales patterns
